Dear Sir: Re: Japanese Fishing Fleet

We have now completed approximately twenty of these boats and would like to claim for this work.

It is our understanding that before this can be done, an overhead and margin of profit must be established by your department.

We would appreciate this being done at your earliest convenience.

Yours truly,

MANAGING DIRECTOR.

Dear Sir: Re: Japanese Fishing Vessels.

We have now completed and delivered to the Navy 122 of these boats. Letters of authority have been received for only 61 leaving a balance of 61 yet to be received.

This delay is preventing us from making up our claims as we cannot make them before we receive the letters of authority.

We understand that all the necessary information has been forwarded to the Vancouver office by the "Time and Material Recorder" stationed at our plant.

It is imperative that we receive these forms so our claims can go forward without delay as otherwise it will be very difficult for us to finance.

Dear Sir: Re: Job No. 214.

Mr. F. McHaffie tells me you would like an explanation regarding the difference of prices on this job i.e. \$23.94 and \$27.27. There is no actual difference, the \$23.94 is the actual cost as shown on my cost card and the \$27.27 is the amount after the 8% allowable profit has been added on.

This misunderstanding quite probably arose through me giving you the incorrect figure over the telephone.

I hope this will clear up this matter.
