road Imagine yourself in a car, the bus, winding up a narrow mountain

. You might be going up to one of the Japanese Relocation centres, T ashme, B .C. Suddenly turning, you would see between towering mountains, a valley, and in it rows and rows of tar-papered houses close together. As you walk through the village of 2200, you would be struck by the tiny flower gardens in front of each house, the neat vegetable ~~xxxx~~ gardens at the back and many other attempts to make these shacks, home. Inside, the houses were lined with building paper,&with curtains instead of doors, -- doors were not allowed. In the crowded kitchen there would likely be two women cooking on one stove, and two wooden tables and benches for their families. Each side of the kitchen were two bedrooms, 8 by 8. Through the curtains you would glimpse the wooden bunks, often double deckers for at first there were two families in each house. Privacy was unknown when 5 to 13 people lived in such a house. But though insecurity, fear of the future,&sometimes bitterness at the government or life itself, walked like a ghost through most homes, you would be welcomed and offered the best cushion for your part of the bench.

3:15 in the afternoon -- almost time for school. Soon across the open space between the two barns rang out the school bells and students loaded with books slowly went into school, the boys playing catch till the last possible moment. These were the public school buildings with double desks and seats made for little children -- a trifle small for our big 16 year old boys. Two classes and then supper. After supper, the older students, many of whom worked all day, some at hard manual labour came in In grade 11, you might hear "You know I 'm teaching this same grammar in Grade 6 and it is so much easier because we're doing it in class too." Yes, three or four were teaching public school in the daytime but wanted also to finish High School. 9 o'clock and the weary monitor of the lower grades would sweep up their room, set it in order for the public school, and be off to bed or t hecommunity baths. The grade 12's would struggle for another hour to keep awake and learn some math or literature. No school F riday -- time for league games, ~~xxxxx~~ council meetings and parties Saturday was a special day. with a short opening worship, discussion groups on what it means to grow up, music appreciation and recess in the daylight to play ball or fool in thesnow.

You will be asking " Why were you teaching theree? Why was school at night? T he answer is simple. Thegovernment refused to provide High Scool educaition. Parents and teenagers crowded around the minister each week saying, "C an't the church do something about it?" The W.M.S. responde to that need and sent in missionaries to teach High School. No building was available in the daytime so school was at night.

One of the school buildings was comparatively low ~~xxxxxxxxxxxxxxxxxxxx~~ T he first large classroom was also the place for small parties, church and part of Sunday School. Sundays at 7 would see teen-agers coming in -- some to church and some to study in another room down the hall. After the service this last group would often come in to listen to the records. Later many of them came to church so that High School students and teachers made up the largest part of the congregation. Many of these young people are in our churches ~~xx~~ today.

What about the pre-school children? Every day you would see a large group at the kindergarten playing in the snow or in their circle inside. This service of the women workers of the Anglican Church relieved many harassed mothers and gave the children a happy creative experience. In our community, the people spoke of ~~this~~ the church's work not by denomination but as THE church, the Christians -- as it should be.

Br months after the signing of the Repatriation forms, threats of imminent deporrtation hung over the heads of all and almost no one was allowed to go east. The church did not sleep. T he church and community leaders sent out 9000 letters across Canada urging protest against the proposed undemocratic Bill 115g. Your petitions and oletters prevented its passage through Parliament. Because of this and many other things the Japanese, Christian and non/Christian knew thatthe church was their friend.

Then came the time when the Canadian born Japanese could go East. Teen age boys and girls were eager to be off. After classes they would come to us:"Please could you get me a school boy job in the East. I want to finish High S chool but I can't ask my parents to support me. Could y you find me a place where I could work for my room and board. I'll work hard. And then perhaps I'll be able to get a place of rthe family to live and a job for Dad. You know they can't leave Tashme till they have that" And so we wrote and 3ired almost everyone we knew in the East. G G reat was the joy when a suitable place was found. In afew days or weeks they would be off. Eaager as they were to leave, there was a tinge of sadness at goxxx leaving.their school, friends specially close because they had gone throgh dark days together. There was also a fear. As one girl/s said:" I know I shouldn't be afraid. We are not different inside, just in colour, bxt I wonder if we'll be accepted or will people stare at us or call "dirty Jap" after us? But I'm glad to go. We are going to try todo our part to solve this whole problem f/ of raciad prejudic ~~xxxxxxxxxxxxxxxxxxxxxxxxxxxxxx~~ Surely the church people will be our friends, they have stood by us." And so it was. You have been their friends. Many need that friendship still today.

What about those who went xxxx to Japan? T he young people did not want to go. Almost all of the students have written expressing their gratitude for the schoob and all it meant. A few weeks ago, I had a letter from one of the boys who saidd in part:" At first I was bitter.---- Everything seemed lost, black. Now I would see avery faint light ahead and am going ahead slowly.-----I shoulk like to study again. Could you please try to get me a course in Mechanics?"

The workd of the W.M.S. in the Relocation Centres cannot be reckoned in dollars and c3nts. It is in the ~~xxxxxxx~~ creative outlook on life that many grew into. It is one of the light spots in this blotch in our country's history.

August 18, 1975

Dear Mrs. Awmack,

How is everything with you and your family? We are all fine and coming along alright.

I am planning to enroll in the Adult Education Program to work for my High School diploma and I would like to ask you a big favor.

Will it be too much trouble for you to check and see how much more credit I need to get my high school diploma? If possible, I would like a transcript. I don't know how much it will cost, so if you would let me know the amount I will mail it to you right away.

If you are unable to do this, will you please let me know where I could write to get the information? I would appreciate it very much as the fall semester will be beginning around the middle of September.

Thank you very much for your trouble.

Sincerely,

Kiyoko

My name before I married was Kiyoko Saito.

3913 Olivia Place,
Victoria BC. V8P4T3
September 4/75.

~~To the Director.~~

Director,
Adult Education Program.

Dear Sir,

I have a letter from Keiyako (Saito) Nakano asking for a transcript of her High School marks so that she can complete her High School. She completed all subjects in grade 11 with average marks - about 65%. This included English literature and grammar, Social studies, Health, science (chemistry, physics, biology), mathematics and French.

~~Keiyako Nakano took her~~

Keiyako Nakano was living in a very isolated Japanese Relocation Centre called Tashme, 14 miles from Hope during her High School years. When the government refused to provide High School education the United Church did so, using the curriculum and correspondence materials made available by the B.C. Department of Education. ~~We did all the marking etc. but~~ Two ~~all~~ teachers were qualified ~~& unqualified teachers~~, ~~or~~ although we set and marked all term tests and exams, in the last year when students would be moving all over Canada and to Japan, students in Grades 11 and 12 wrote some of the ~~Government~~ exams set by the Dept. of Education for provincial

testing. The transcript enclosed is from these exams.
At the time when students were studying for these exams
in June '46 the entire community of 2200 Japanese Canadians
was in the turmoil of getting ready to move out from
the Camp, some to travel east of the Rockies in order to stay
in Canada and others to go to Japan. It was very hard
on the students, especially those going to Japan as they
felt they might never see their friends again. By the (+ were going to a foreign country)
time the exams were written, one half of those going
to Japan had left the community and the students
who were slated for the other boat to Japan wondered
if the exams were worth the effort as in all probability
they would have almost no chance of further
schooling in Japan. Kiyoko was among those who
sailed on the second boat. I think this explains
the low marks in some subjects.

I feel that the experience gained in Japan
and several other part of the world should
make Kiyoko a good 'mature' student in
whatever field she chooses.

Sincerely,

Winifred J. Aumack.

IV. Dats Hori
Harry Watanaka
Kaji Morishita
Yoshi Nakamura
Dats Kayanaga

ALGEBRA II. Papers 14 - 16.

1. The formula for a differential pulley (a pulley block made up of pulleys of 2 different sizes with an endless chain, used ~~xx~~ in garages) is:

$$\frac{W}{E} = \frac{2R}{R - r}$$ where R = radius large pulley
r = " small "
W = weight
E = effort

Change the formula making R the subject.

2. 300 grams of water at 10°C is poured into a 1000 gram aluminum pot at 80°C. What is the resulting temperature of the water and pot if the specific heat of aluminum is .21.

(cp.)

3. Two lamps (4 candlepower and 12 candlepower) are placed 10 feet apart. At what point between the lamps will the illumination on a screen be equal if:

$$\frac{cp}{distance} = \frac{cp_1}{dist.^2}$$

4. If a body starts from rest and the acceleration (a) is constant, the velocity or speed (v) varies as the square of the distance (s). Formula: $2as = V^2$
If the acceleration is 1 foot per second, plot a graph of the formula for velocities from 1 to 10ft. per sec. ($2s = V^2$). From your graph (a) What is the distance when V is $3\frac{1}{2}$ seconds. (b) What is V when distance covered is 26ft?

5. Solve graphically: At noon A starts to ride at 6 miles per hour. 2 hours later B follows riding at 12 miles an hour but resting for half an hour at the end of each hour. Find at what time B overtakes A and how far they have gone when they meet. How far behind A is B at 4PM

Algebra II.

1. Find the logs of the following numbers.

(a) 23700. 4. 3747

(b) 4753 2. 6770

(c) .0897 $\bar{2}$. 9405

(d) ~~9,432,000~~

2. Find the numbers whose logs are:

(a) 2. 7853 610.0

(b) 0. 2969 1.981

(c) $\bar{3}$. 6529 .004497

~~(d)~~

3. Find by logs the value of the following.

3 (a) $\frac{273 \times 382 \times 597}{27 \times 394} = 5853$

273 = 2. 4362
382 = 2. 5821
597 = 2. 7760
7.7943
4.0269
3.7674

27 = 1. 4314
394 = 2. 5955
4.0269

3 (b) $(5.754)^5$ 6310

5 (5754 = 0.7600)
38000

3 (c) $\sqrt[3]{7327}$ 19.42.

$\frac{1}{3} \times 3.8649 = 1.2883$

19.42

3 (d) $\frac{.3254}{.0897} = 362.75$

.3254 = $\bar{1}$. 5129
.0897 $\bar{2}$. 9528
+2 + 0.5596
.247 = $\bar{5}$ ($\bar{1}$. 3927)
$\bar{5}$ + 1.9635 = $\bar{4}$. 9635

3 (e) $(.247)^5$ .0009194

4 (f) $\sqrt{\frac{3.752 \times 0.86}{.0002742 \times 3.94}} = .5464$

3.752 = 0. 5742
0.86 = $\bar{1}$. 9345
0.5087
$\bar{1}$.0336

~~.0002742~~ = $\bar{6}$. 4381
3.94 = 0. 5955
$\bar{6}$.0336

$\frac{1}{2}$ ($\bar{2}$. 4751)
1. 2
$\frac{1}{2}$ (-2 + 1.4751)
-1 + .7375 = .5464

Algebra II. 1 period.

Simplify and express with positive indices.

1. $\left[\left(\sqrt{a^3}\right)^{-2}\right]^{-1/3}$.

2. $\left(\frac{a^3}{b^2}\right)^{1/4} \times \left(\frac{c^2}{b^{-1}}\right)^{1/3} \div \left(\frac{a^{-3/2}}{bc^{-3}}\right)^{1/6}$.

3. $\frac{a^{4/3} - 8a^{1/3}b}{a^{2/3} + 2\sqrt[3]{ab} + 4b^{2/3}}$.

4. $\frac{x - 7x^{1/2}}{x - 5\sqrt{x} - 14} \div \left(1 + \frac{2}{\sqrt{x}}\right)^{-1}$

Express in the simplest form.

5. $\sqrt{125}$

6. $\sqrt{27m^2n^3}$.

8. $\sqrt{108} - \sqrt{48} + \sqrt{75}$

9. $\sqrt{252} - \sqrt{294} - 48\sqrt{\frac{1}{6}}$

7. $\sqrt{(a^2-b^2)(a+b)}$

Ann - + 7 - all turned blue (starch)? Wants to leave.
Tatsuko - HCl.
Sho - stick to facts, imperative.

Tatsuko, Fumi - copying.
Sumi S - sq white wash down, not lab material

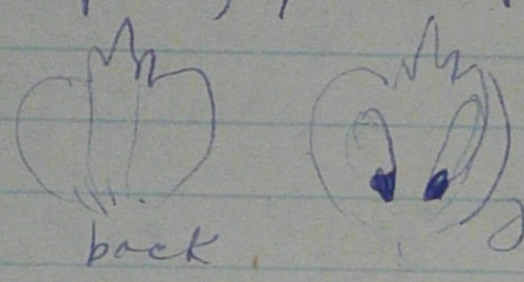

Jesso –

HCl and Ammonia experiment – this year's.
Distructive distillation of wood. ✓
~~Charcoal~~ – bone black. ✓
Magic writing. – Sample.
Test of drinking water – permanganate. ✓
Lenses – f find focal lengths.
– refraction

1. Stems – diagrams of different groups.
Dry place tree – as jelubox douglas fir.
– almost no pith much wood, thin bark
Wet place – alder – large pith small wood bark
Solomon seal – scattered bundle –
~~Habitat~~ –

2. ~~Plants~~ Identify 3 plants from each of the following habitats.
(a) aquatic (b) transitional (c) terrestial.
3. Study the habitat + structural adaptations of the following groups of plants.
(a) willow cedar, hemlock, spruce Wet.
(b) Maple, douglas fir, birch . med
(c) Oak, arbutus, jack pine, yellow pine. Dr.

+ Drawings –
(a) Cone – naked seeds.

Apple – covered seeds.
(b) Fish – from book.
(c) Grasshopper – from book. Compare with bee.

Mendel's Laws – Kato.
Adaptation of mammal of living on land.
