

*This picture really ought to be heard*

Sure the picture is inviting. Nice swans, too. But to be really appreciated this scene should be *heard* as well as seen.

We refer to Canada Dry's "PIN-POINT CARBONATION"—millions of tinier bubbles that bring a liveliness you can hear...and zest you can taste to drinks mixed with Canada Dry Water or Ginger Ale. Even melting ice cannot drown the

sparkling chorus and tangy goodness of these lively mixers.

Make the most of your precious liquor stocks. Canada Dry's special formula points up the flavor of any tall drink—scotch, rye, bourbon, or rum.

**\*PIN-POINT CARBONATION**—the famous Canada Dry method of achieving livelier and longer-lasting zest.

NOTE: Obviously, it is impossible here to portray each of the many arms and services that comprise our Fighting Forces. Those selected for illustration are intended to typify ALL of the many millions now serving their country.
