

Tokyo, Japan,  
January 13, 1961.

FILE NO: 339

Dear ~~XXXXXX~~ Madam,

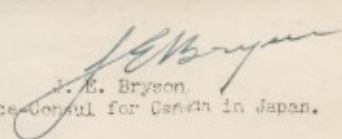

Provisional approval has now been received for your entry into Canada with your children, Rieko, Takashi and Mitsuko.

Your first step is to obtain a Japanese passport which is required in connection with the preparation of medical documents. After you have obtained your passport the following medical papers are required from a hospital of well-known repute:

1. An x-ray film of the chest, not smaller than 14" x 17". The film must show the applicant's name and passport number over the signature of the radiologist, together with the date the x-ray was taken.
2. A radiologist's report on the x-ray film: the applicant's name and passport number must be stated and the report must be signed.
3. Medical examination by a doctor of high repute on the enclosed form IMS 17.
4. The above documents are to be completed in English and returned to the Embassy as soon as possible, together with the required fee of ¥ 605 to cover airmail charges to Ottawa.
5. Children under 11 years of age do NOT require x-ray films of the chest.

As soon as a report on your case is received I shall inform you of the results.

Yours sincerely,

  
J. E. Bryson  
Vice Consul for Canada in Japan.

Mrs. Kinko TONOMURA,  
66 Shokushi-cho, Nishino-kyo,  
Nagagyo-ku, Kyoto-shi.

P.S. Since your children, Rieko and Mitsuko, are Canadian Citizens, they do not need medical examination.
