

Night-letter to Kasey Oyama Nov.8, 1946

Have been requested by Cooperative Committee here to send you following telegram for insertion in New Canadian Quote Cheques are being sent out by registered mail by Custodian purporting to be in full payment of balances from sale of properties of Japanese Canadians by Custodian. In our opinion acceptance of cheques would be fatal bar to further legal claims in respect to sale of properties and might prejudice contemplated representations to Government for appointment of a claims commission to review whole matter of forced sales. I would advise that where possible cheques be returned to Custodian with letter stating that to accept would prejudice legal rights and claims to full restitution
