BANKER SEES CANADA AS GREAT COUNTRY

Country Held Leading Factor in International Wheat Trade

TORONTO, May 29—In a period of intense economic activity in which world production reached a record level, the rise of Canada to a position of outstanding importance in many of the most important industries of economic trend.

Such is one of the remarkable facts brought out in an analysis of world and Canadian business, for which C. B. H. Logan, general manager of the Canadian Bank of Commerce, is responsible. There is, however, more to the view shown by this survey, than the mere recording of the fact that war influence left a mass of economic disorder. Inflation of credit and currency, severe depression in competitive production, unemployment, political unrest, economic weakness of debtor countries, and serious labor troubles—these have been a few of the difficulties which faced world business. But, as Sir Joseph Flavelle once pointed out, the great body of people continued to work, produce and trade, and the underlying forces of trend, largely as a result of the war, operated to economic betterment of the world finally when conditions along the broadest front of economic pursuit ameliorated.

The evening advance, dating from 1925, was not uniform the world over; the United States, Canada and Australia showed the greatest degree of absolute, but progress was made everywhere on the continents. Europe's advance was as rapid as to place her among the first group of nations which enjoy a highly diversified economic life, with a wide range of industry and opportunity for the application of applied science. The Canada established herself firmly as the leading factor in international wheat trade, and he appears to have made the greatest relative advance in orchestrated farming.

Great deposits of asbestos and nickel continued to be the world's largest sources of supply of these rare minerals and, in regard to the latter, new uses were developed which increased it tremendously important; she gained new ore bodies which placed her in the front rank of producers of gold and silver, found herself in copper and lead and zinc in nine; and those were held for the extension of her metallurgical industry which would place it among the leaders in its class.

While Canadian production of crude petroleum and steel was but a small fraction of the world's total, the rate of increase was more than that of the world as a whole. In certain other industries, such as pulp and paper, Canada made extraordinary progress; she rose to second position in automobile manufacturing and in third in paper and aluminum and fifth in rayon. Her hydro-electric development for the year of development, with 2,000,000 horsepower in 1930 the second largest hydro-electric plant, capable of producing almost 15 per cent of the world's total of this form of energy.

SALES INCREASE IN N.Y. STORES

NEW YORK, May 29.—Substantial increases are shown in the sales of department stores and chain stores in this district during April are reported by the New York Federal Reserve bank, but the gains are attributed largely to the earlier trade. Wholesale dealers reported April sales 19 per cent smaller than in the same month in 1929.

NEW LOW PRICE FOR SILVER

NEW YORK, May 29.—A new advance for silver was recorded in the London market on the first time this week, when the metal was quoted 3-64d. to 1-16d. Ounces of silver were quoted at 17 5-16d.

LONDON, May 29.—Bar silver 17 5-16 per ounce, up 1-16d. from previous quotation. This is the second new record in the metal this week.

In common with other commodities silver has been affected by the general trade depression, but the fact that the metal has established a new record in the face of this depression is regarded as significant. Apart from the direction of the price movement, the fact that the price is being made in the London market is also significant, as it indicates that the metal is being bought for actual consumption, rather than for speculative purposes.

SILVER CUP TO START WORK

Managing Director on Visit to Mine

Arranging for the summer's development campaign at the Silver Cup mine, near Silverton, Mr. T. R. Lowery, president and managing director of the Consolidated Mining and Smelting company, is at the mine at Silverton. Mr. Lowery was the lone representative here of the Federal company, Consolidated, as the largest mining companies in the world.

The Silver Cup has a 75-ton modern concentrator, upon which will be used ore with tonnage of high grade but sufficient to keep the mill busy steadily. Mr. Lowe's advice is that the Silver Cup, with practically all preliminary work completed, will embark upon paying operations from the start.

In addition to Mr. Lowe's the directorate consists of Mr. Alwin Barker, Nelson; Mr. John Dinsmore, Mr. J. E. Brady, Mr. and Mr. L. M. Diether, all of Vancouver.

BANK PROFITS INCREASE

Montreal Issues Half Yearly Statement

MONTREAL, May 29.—Half yearly statement of the Bank of Montreal, covering the six months ended April 30, shows paid-up capital at $36,000,000, as compared with $34,560,000 for the same period a year previous. Reserve fund advanced $2,000,000 to $36,000,000 as compared to $34,000,000 for the corresponding period last year.

Profits for the six months were $1,282,248 compared with $915,705,893 in 1929. Current loans and discounts in Canada amounted to $235,301,184, an increase over the amount at the corresponding date last year which was $174,484,197.

Canadian deposits totalled $340,894,257, non-interest bearing $130,418,497.

WEST BUSINESS IMPROVES

WINNIPEG, May 29.—Expansion of outdoor activities has stimulated industrial and business situation in Western Canada, in the opinion of A. E. Warren, vice president, Canadian National Railways, who arrived today from the west.

Other factors such as agricultural conditions and building activity and the proceeding of construction contracts have also contributed stimulus to general business, Mr. Warren pointed out, adding that crop conditions within a short time.

RAIL EARNINGS DECREASE

MONTREAL, May 29.—Net traffic earnings of the Canadian Pacific Railway company for April, after deducting working expenses, were $1,-1929, of $1,241,138. The figures for April this year were $1,812,-824 for the same month last year, a decrease of $1,474,442.

Bank of England Statement

LONDON, May 29.—Weekly statement of the Bank of England shows the following changes in pounds: Total reserve decreased £1,704,000; circulation increased 1,457,000; bullion decreased 247,000; other securities decreased 2,150,000; public deposits decreased 7,259,000; other deposits increased 101,000; note reserve decreased 1,704,000; government securities decreased 4,316,000.

The proportion of the bank's reserve to liability is 37.33 per cent compared with 34.81 last week. Rate of discount 3 per cent.

Red Coulee Wells Show Promise

Southern Alberta boring district, which is just east of Commonwealth, down 2415 feet and above 1st Trend, 2,400 feet and about struck over 3,000 feet of oil, is going to be set down. Drilling is going to be set down.

Drilled No. 1 also in the Red Coulee district has very good gas showings with salty water, considered excellent. Mid-Continent is now fishing for tools which have caused an increased gas pressure.
