# JAPANESE PARTY BRINGS FAMOUS SWORD FOR GOV. GENERAL

## GOODWILL SHOWN IN UNIQUE GIFT

### Delegation Here From Tokyo Shown Vancouver

By FRANK WHITEHEAD  
Canadian Press Staff Correspondent  
TOKYO, Japan, July 28.—An ancient Japanese sword of exquisite workmanship will be presented to the Governor General of Canada by a small delegation of Japanese visiting here. The presentation will be made at the home of the Governor General, the Governor General's residence, the Governor General's residence, the Governor General's residence.

### Perfect Lenses for Imperfect Eyes

Of the senses of man none is more highly prized than that of sight. Blindness or anything approaching blindness, is universally feared and deplored. Upon his powers of vision man depends to great extent, not only for his perception of the beautiful things of life but for his very means of livelihood.

### PRESENT DAY EYE NEEDS

This is much truer today than in the time of our forefathers. With the present day development of the arts and sciences and of modern industry, man finds himself compelled to use his eyes much more universally and exactly than did his ancestors. Eye work is more general and vastly more important.

The result of such a condition is two-fold. It means that the human eye is subjected to much greater strains than formerly and, at the same time, that the satisfactory performance of its functions is more essential to human happiness. The failing of vision, then, spells even greater disaster to the individual than it did one hundred, or even fifty years ago.

Modern vision is greatly improved and conserved by the high standard of present day optometric service. The proper grade of glass and lens is second in importance only to the ability of the optometrist who examines your eyes and finishes and fits your glasses.
