

War Relief Parley May be Held in Montreal in July

Japs Plan To Contest First Sale

If and when the custodian of enemy alien property makes the first move towards disposal of Japanese-owned real estate in Vancouver, the legal wheels will be put in motion to stop him, according to present plans.

J. Arthur MacLennan, solicitor for the Japanese who propose to fight the sale, states that a petition of right will be sent to the Secretary of State at Ottawa as soon as the sale is advertised, which may not be before June 16.

The petition of right actually is an application to the Secretary of State for leave to sue the Crown in an attempt to prove the government has not the legal power to dispose of the Jap-held property.

NAZI TOOTLES SWAN SONG

Captured in Tunisia, this member of a German band blows his bassoon in solemn serenade for war-weary comrades.

Ferry Jaunts Scheduled to Horseshoe Bay

WEST VANCOUVER, June 4.—West Vancouver transportation department hopes to start its schedule of trips to Horseshoe Bay planned for this summer on June 26. A Harvey Smith, chairman of transportation, said today.

The schedule will probably provide one trip a day leaving the Vancouver wharf early in the afternoon, and returning in the evening, on Wednesdays, Saturdays and Sundays.

Use of the ferries on these trips will automatically eliminate the Wednesday evening rush hour schedule on the regular service between Ambleside and Vancouver.

The Wednesday schedule will then be identical with that of Saturday which provides for a 20-minute rush hour service in the

Food for Devastated Areas to Be Planned

By J. F. SANDERSON

Canadian Press Staff Writer

HOT SPRINGS, Va., June 4.—The first great conference of the United Nations was over today, with plans already in motion for another one which might be held in Montreal.

This would take the form of an international conference on relief, and discussion of its early meeting was the dominant topic among food parley delegates today as they departed for home.

They seemed to think Montreal would be the site of such a conference, although Washington and Hot Springs were also mentioned as possibilities.

It was generally expected, however, that the relief parley would be a much smaller affair than the food conference, and that it would begin its deliberations sometime before mid-July.

Relief problems as such were morning, and a half-hour service for the rest of the day.

Odd Fellows To Convene

Several groups of the Independent Order of Odd Fellows will hold annual conventions in Vancouver next week.

Sessions of the grand lodge will be held in the IOOF Hall, 2214 Main, on Wednesday and Thursday, with Alex McCabe, grand master, presiding.

The grand encampment will meet in the IOOF Hall, Pender and Hamilton, on Tuesday, with Thomas Hardman, grand patriarch, presiding.

A special session of the Rebekah Assembly on Tuesday evening, will be the prelude to the annual sessions in the IOOF Hall, 1443 East Eighth, on Wednesday and Thursday. Mrs. Bessie Bridge, president, will preside.

The department council of past masters will convene Tuesday night in the IOOF Hall, 2214 Main. Col. J. G. Ferry, department commander, will be in the chair.

Royal City Market

Prices remained firm today on New Westminster Market.

First new potatoes were noted, produced by Fred Young and some Oriental growers. They were a fair size and were selling at 5 cents a pound.

There was also a fair supply of local lettuce and onions.

A big demand for fish and poultry was noted because of meat rationing.

There was also still a good demand for bedding plants.

EGGS

	Producer	Retail
Grade A large	30	40
Grade A medium	28	38
Grade A pullets	25	35
Special	41	41
Pewees	15	25

Beef, cow, Grade B	33
Pork, butchers, lb.	38
Veal, choice, lb.	37
Veal, seconds, lb.	34 to 35

The People's Rights

ONE of the fundamentals of human liberty is the right of the individual to choose his own method of seeking health. It is a right which equals that of the freedom of the press, freedom of speech and freedom of worship.

The people of Canada are therefore deeply concerned about any Federal or Provincial legislation which transgresses on this fundamental privilege of a liberty-loving nation.

CANADA'S HEALTH INSURANCE ACT

Under the proposed Health Insurance Act, Canadians may not seek the aid of any health practitioner other than a medical man. Yet two million Canadians depend on Chiropractic for health and desire Chiropractors as health advisors. On our own behalf, we seek no special legislation or special privilege, but ask only that the sick have the right to get well by whatever method they desire. We, as voters, and as taxpayers, and as citizens look to the Government of Canada to uphold our liberties.

PHYSICAL FITNESS AND THE WAR EFFORT

With physical fitness playing such an important part in Canada's War Effort and in public welfare in the post-war period, the inclusion of Chiropractic in the Health Insurance Act is a vital issue. It affects not only those now in Canada, but the men and women of our armed forces who will return from overseas to take up civilian occupations when the war is over.

With a sense of their responsibilities to Canada's Health program, Canadian Chiropractors, early this year, organized the Canadian Chiropractors' Association, with offices from coast to coast. The aims of the Association are to broaden and enlarge the scope of treatment and to extend the science of the profession further afield for the benefit of all Canadians.

CHIROPRACTIC TREATMENTS PROVEN

Countless thousands have found health through the offices of trained chiropractors. A survey of 93,039 cases, treated by 412 Chiropractors, reveals a record of 85.15 percent

WORLD'S SECOND LARGEST HEALING PROFESSION

During the span of 50 years the Chiropractic profession has so increased in public service, the result of years of practical experience, that today it stands as the second largest profession in the world engaged in the protection and restoration of health.

Almost every known disease, from the common cold to that of infantile paralysis, has successfully responded to Chiropractic treatment. Many of the most stubborn diseases with which people are afflicted, have responded readily to Chiropractic treatment.

NO MYSTERY ABOUT CHIROPRACTIC TREATMENT

The Chiropractic method for the maintenance and restoration of health is one of the simplest forms of treatment known. Its principles are without mystery to the skilled Chiropractor. The success of Chiropractic treatments is based upon the knowledge that the health of the body depends fundamentally on the flow of vital force and energy through the nervous system to all organs of the body. Chiropractic treatments act instantly upon the source of the ailment and charge the affected parts with vital force.

IS THIS THE PEOPLE'S WILL?

The National Committee under the proposed Health Insurance Act will consist of at least 18 medical doctors, including the Director of Health Insurance, the Deputy Minister of
