Sirs;

Will you please send me information about the Japanese fishing boats that the government has taken control of.

There are four of us ~~there~~ who would like to lease a vessel but would first like to know; what is the price at which salmon sells, when does the season open, what is considered an average catch, does one of the men on board require a navigator's ticket? We would also like to know at what rate of rental the boats are let out?

Very truly yours  
E. E. Jankess.
